Lab 2 - Session 3

Daniel Perdices

May 13, 2024

Universidad Autónoma
de Madrid

What are we going to do today?

About next week

Linux networking

Self-assessment

Material

Let's talk about SatCom

About next week

Linux networking

How to change parameters?

Change IP address

```
ip addr add <ip> dev <itf>
```

or

```
ifconfig <itf> <ip> netmask <netmask>
```

Disable ARP

```
ip link set dev <itf> arp off
```

Self-assessment

What you should have done by today

- A running version of arp.py

- A fully working version of ethernet.py

- Questions about testing the program.

Material

Where are these slides?

dperdices.github.io/redes1-1391-2022/

github.com/dperdices/redes1-1391-2022

- Source code of this slides (in markdown)

- Slides in PDF

- Other resources

If you want a completed version or find any mistakes,

- Fork the repo

- Complete it / Fix it yourself

- Make a PR

- Wait for my approval (or comments)
